PROJECTS

PIQUED - RUBY ON RAILS, JAVASCRIPT, REACT + REDUX, POSTGRESQL, HTML, CSS

Pinterest inspired single page app, see: [Live](#) | [Repo](#)

- Utilized paperclip and AWS S3 cloud storage to allow app to easily scale giving users total control over app expansion
- Integration of React + Redux to normalize state allowing for more accessible data by allowing reducers cross computational data mining per AJAX call
- Produced DRY, extensible React components with a modular design to allow for increased scalability and maintenance.

CRYPTOVIZ - JAVASCRIPT, JQUERY, CSS, HTML

Data visualization of cryptocurrency financials [Live](#) | [Repo](#)

- Employed API calls to external sources while rendering the JSON with D3 to dynamically instantiate interactive donut and candlestick charts
- Animated transitions handled by D3 and CSS provide a smoother and more appealing user experience while staying true to the data

CHIEFDOM - JAVASCRIPT

DOM manipulation inspired by jQuery Live | [Repo](#)

- Functionally supports the creation and selection of DOM Elements via HTML tags, ids or classes
- Through selection of DOM elements, it allows for the addition and removing of event handlers

EXPERIENCE

NEW YORK METHODIST HOSPITAL

NEW YORK, NY

Time Keeping Coordinator

December 2014 – February 2015

- Facilitated the implementation of the Kronos timekeeping system while managing a team of specialists to ensure entry of all 4K+ NYM personnel
