RELATED EXPERIENCE

J.CREW   **NEW YORK, NY**
Full Stack Engineer   **February 2018 – Present**
- ➔ Worked on J.Crew's ecommerce platform which serves 69 million users per year
- ➔ Created and maintained the automation testing environment utilizing Selenium and Jest. I coupled the framework with a UI designed and created with React, Redux, Node and Docker for QA utilization
- ➔ Created several other internal tools saving J.Crew $250K+ per year

NEW YORK METHODIST HOSPITAL   **NEW YORK, NY**
Time Keeping Coordinator   **December 2014 – February 2015**
- ➔ Facilitated the implementation of the Kronos timekeeping system while managing a team of specialists to ensure entry of all 4K+ NYM personnel
- ➔ Generated specialized reports utilizing advanced excel as well as queries and data analysis from the Kronos workforce system

PENSION PARTNERS LLC   **NEW YORK, NY**
Research & Marketing Associate   **March 2012 – June 2013**
- ➔ Spearheaded marketing initiative for launch of newly established mutual fund, playing central role in helping fund reach +$130M in AUM within first year
- ➔ Performed search engine optimization duties while overseeing the creation of new web presences; including, websites, social media pages, RSS feeds, etc.
- ➔ Implemented Salesforce CRM and performed advanced Excel functions – VLOOKUP, macros, and Index Match – to organize, store, and clean client data.

APPNEXUS   **NEW YORK, NY**
Domain Quality Auditor   **February 2012 – January 2014**
- ➔ Responsible for auditing domain URL's serving through the AppNexus platform based on technical attributes, category, and certain rules and regulations

PROJECTS

JPIQUED - RUBY ON RAILS, JAVASCRIPT, REACT + REDUX, POSTGRESQL, HTML, CSS
Pinterest inspired single page app, see: Live | Repo
- ➔ Utilized paperclip and AWS S3 cloud storage to allow app to easily scale giving users total control over app expansion
- ➔ Integration of React + Redux to normalize state allowing for more accessible data by allowing reducers cross computational data mining per AJAX call
- ➔ Produced DRY, extensible React components with a modular design to allow for increased scalability and maintenance

CRYPTOVIZ - JAVASCRIPT, JQUERY, CSS, HTML
Data visualization of cryptocurrency financials Live | Repo
- ➔ Employed API calls to external sources while rendering the JSON with D3 to dynamically instantiate interactive donut and candlestick charts
- ➔ Animated transitions handled by D3 and CSS provide a smoother and more appealing user experience while staying true to the data

EDUCATION

APP/ACADEMY   **NEW YORK, NY**
1000-hour immersive full-stack web development intensive with <3% acceptance rate, which emphasizes coding style, pair programming, and best practices.

STONY BROOK UNIVERSITY   **STONY BROOK, NY**
Economics/Pre-medicine, Major GPA: 3.4, *Dean's List*   **Sept. 2006 – May 2010**
